PROJECT DESCRIPTION

Construction of a surface sealing system BA 7 - 8

The works include the following topics:

- Installation of a surface sealing system, approx. 9 hectares
- Roadworks
- Surface water collection system, including construction of a cascade and two percolation basins
- Gas collection system, including installation of a new gas collection station, installation of new gas pipes and connection to existing gas wells
- Seeding and planting works, new habitats for lizzards

Following equipment was used:

- Wheel loader (Volvo L150)
- Caterpillar (Liebherr 736)
- Excavator (CAT 323)
- Different rollers (e.g. sheep foot roller and smooth roller)
